The are two locations. The fuel filter is either under the fuse box there are 2 canisters the bigger one is the fuel filter .If not there then it is under the back pasager side wing you have to take the inner protection off. The fuel/diesel filter is under the bonnet, on the left side behind the engine bay fuse box.

Given the unreliable cetane rating, and state of decomposition of old diesel, it isn't worth re-using a small quantity in an engine. For large quantities you could filter, mix, lab test it for conformity with fuel standards and reuse it. Alternatively waste fuel blenders like old diesel of known pedigree to
