Sets A and B share numbers 2 and 3, and sets B and C share the number 4. Therefore, we need to write 2 and 3 in the intersection of circle A and circle B, and the number 4 in the intersection of circle B and circle C. In set A, we have already input numbers 2 and 3 on the Venn diagram, so we now need to input numbers 5, \, 7, \, 11, \, 13, \, 17, \, 19.

A set is a group of objects. Each object is known as a member of the set. A set can be represented using curly brackets. So a set containing the numbers 2, 4, 6, 8, 10, ... is: {2, 4, 6, 8, 10, ... } . Sets are often also represented by letters, so this set might be E = {2, 4, 6, 8, 10, ...} . Alternatively, E = {even numbers} . Common Sets

Purplemath. Venn diagrams can be used to express the logical (in the mathematical sense) relationships between various sets. The following examples should help you understand the notation, terminology, and concepts relating Venn diagrams and set notation.. Let's say that our universe contains the numbers 1, 2, 3, and 4, so U = {1, 2, 3, 4}.Let A be the set containing the numbers 1 and 2; that ...
